Please do **not spayed or neuter before 16 months of age**. A large breed neutered dog has 10X the HD, 30X the bone cancer,, much higher rates of all other autoimmune diseases, and temper neurosis, then their unneutered counter parts. Hormones are essential in proper growth of brain and bone they do a lot more then just sex. This dog is not sold for breeding(unless otherwise stated) , and spaying is still recommended at a later age.
